DEFINITIONS

CCF 1 CCF = 100 cubic feet of gas. This is how we measure your monthly usage.

Customer charge and base amount. Covers fixed costs for reading meters, issuing bills, maintaining facilities and gas lines, postage, etc. These costs occur even if you do not use gas during a billing period.

Gas Cost Adjustment (GCA) is the cost CenterPoint Energy pays for the gas it delivers to its customers.

Storage inventory charge allows the Company the opportunity to recover the regulated carrying cost of its investment in storage.

Reimbursement of local franchise fee is a fee paid to the city for the company's use of right-of-way in streets and alleys.

Reimbursement of state gross receipts tax is a tax imposed by the State of Texas on each utility company located in an incorporated city having a population of more than 1,000.

For a more detailed description of each of the terms used on your bill, please visit CenterPointEnergy.com/definitions or call Customer Support at 800-427-7142.

- **Moving?** Please call us at 800-427-7142 at least two weeks before you move, or complete the forms at CenterPointEnergy.com/selfservice

Notice to customers regarding customer-owned service lines:

Buried natural gas piping running from the gas meter to your home or gas utilization equipment is your responsibility to maintain.

Natural gas utilization equipment includes items such as yard lights, pool heaters and grills.

Failure to properly inspect and repair buried gas line could lead to dangerous conditions.

Escanee aquí para obtener más información sobre la seguridad del gas natural.

Scan the QR code for more information or visit **CenterPointEnergy.com/PipelineSafety.**

Before you do any digging, call 811 to know what's below.

220919_21

The ins and outs of excess flow valves.

Excess flow valves (EFVs) are optional devices that can be installed by CenterPoint Energy on your existing natural gas service line for an installation fee. The valves are designed to:

- Restrict natural gas flow when it exceeds prescribed limits
- Helps prevent the build up of gas
- Reduces chance of natural gas fires and explosions, personal injury and property damage
- Customers can contact us to discuss the benefits of installing an EVF on existing gas service lines and installation costs

Curious if your home or business has an EFV?

Scan the QR to learn more about EFVs.

220920_01

Federal Low Income Home Energy Assistance (LIHEAP) funds are now available.

Contact your local LIHEAP agency or call 211 for qualification details.

You may qualify for one or more federal, state and local energy assistance programs available to help homeowners or renters with their energy bills. Customers must meet specific state income guidelines to qualify for assistance.

Energy-saving tips

- Stop drafts by caulking and weather-stripping cracks around door and window frames and at door bottoms.
- Close off unused rooms/vents and move furniture away from vents and windows.
- Wash clothes in cold or warm (not hot) water and rinse in cold.

Scan the QR code for more financial assistance information and additional energy-saving tips.

A safety message from CenterPoint Energy

If you smell natural gas, leave immediately. Call our Gas Leak Hotline at 800-296-9815. Do not use or store flammable products such as gasoline in the same room or area near the water heater or any other gas appliance.

Si percibes un olor a gas natural, sal inmediatamente. Llama a nuestra línea telefónica para fugas de gas a uno de los números de teléfono que aparecen arriba. No use ni almacene productos inflamables tales como gasolina en la misma habitación o en áreas cercanas a un calentador de agua u otro tipo de aparato a gas.

How to read your meter

The following is an example of how to read a typical meter index.

Look at the four dials with their curved arrows. Read from right to left as follows:

1. Read the "thousand-foot" dial as 7, the last number that the pointer passed. Note that the curved arrow on the dial shows a clockwise movement of the pointer.
2. Read the next dial, the "100-thousand" dial. The curved arrow on the dial above shows a

counterclockwise direction. The pointer is near the 9, but to be sure whether to read it as that number or the lower number 8, the previously mentioned "same or lower number rule" must be applied. Since the pointer in the "thousand-foot" dial to the right is nearer the 8 and the pointer has not reached the 0, the "100-thousand" dial should be read as 8.

3. Read the "100-thousand" dial, it seems to point to 2. Double-check by using the rule above. Since the pointer of the "100-thousand" dial is between 8 and 9, take the lower reading number, 1, for the "100-thousand" dial.

4. Read the left-most dial, the "million-foot" dial. The pointer is near the 6. Using the "same or lower number rule", we find the pointer on the dial to the right is between 1 and 2, so we read the "million-foot" dial exactly as the number it is on or near, 6.

The entire meter reading is 6187.

The ins and
