Attachment 1 - Water Strategy Grants

A. Project Requirements

Water Strategy Grants funded under this NOFO must meet the requirements listed below. These requirements are intended to guide the planning process but still allow recipients flexibility to use an approach that meets their budget and planning needs.

The three following project components are required to be completed upon selection of a Water Strategy Grant:

1. **Required Project Component 1: Outreach and Partnership Building**—Informing and obtaining input from potential participants or stakeholders within the relevant geographic area, including:
 - Develop a public engagement plan that describes how the public will be involved and when public comment will occur throughout the course of the study and design project.
 - Conducting outreach to potential partners, participants, and interested or affected stakeholders in the area. For example, hosting workshops to gather input and feedback on the development of the water marketing, water supply, or restoration strategy.
 - Making the draft strategy document available for review and comment to stakeholders and others as appropriate.

Note: Outreach and partnership building costs, including advertising and public relations costs, must be directly related to the development of the strategy project, as opposed to providing general information or advertisements. Please see the applicable cost principles contained in 2 CFR Part §200.421 Advertising and Public Relations, available at the Electronic Code of Federal Regulations (www.ecfr.gov).

2. **Required Project Component 2: Analyses, Scoping and Planning Activities**—Water Strategy Grant projects must include planning activities to support the development of a future water supply project (e.g., domestic water supply projects), water management project or water market/marketing activities, and at a minimum must include the following planning activities described in more detail below:
 - a. Analysis of problems and needs
 - b. Identification of potential opportunities and comparison of alternatives, and prioritization of project concepts
 - c. Development of strategy for moving forward with project concepts

The types of eligible activities that may be included as sub-tasks within a-c of this required component are described in more detail below in Section B of this Attachment.

3. Required Project Component 3: Development of a Water Strategy Document— A written water strategy document must be completed and included with the final performance report. Reclamation will review the strategy document to determine if it meets program requirements, but will not provide input or feedback on the substance of the strategy. **A strategy is a written document and must address each of the following topics:**

- **Outreach Summary:** The outreach conducted under required project component 1, including a description of how input was solicited, the input received, and how the input was addressed in the course of the planning activities and in developing the strategy
- **Statement of Problems and Needs:** Summarize the work performed under required project component 2 and identify the problems and needs in the planning area, including, for example, the issues related to water supply reliability and needs for different water uses, the need for new infrastructure or infrastructure improvements, issues related to operation of a water market, or issues related to the environment or restoration needs within the planning area.
- **Project Opportunities and Comparison of Alternatives:** Summarize the work performed under required project component 2 to identify, compare and prioritize potential solutions/projects to address the problems and needs in the planning area, and:
 - Describe the solutions or potential on-the-ground projects identified, and their relative priority.
 - Explain the findings and conclusions resulting from your comparison of project costs and benefits (for example, are the expected benefits of the projects or water market/activity identified still realistic after comparing alternatives?).
- **Implementation Strategy:** Describe your strategy for moving forward with project concepts or solutions identified through your planning effort, including:
 - How the potential projects or water marketing activities identified will be implemented following completion of the strategy, and any barriers to implementation.
 - For water marketing strategies, please also describe: The potential administrative and legal framework for the water market or marketing activities including, the institutional components (i.e., how will marketing activities be overseen and tracked?), the participants, water rights, infrastructure involved, and the types of legal agreements used or needed, and description of potential rules and requirements for operation of the water market or marketing activity.

- Next steps for project development, including future outreach plans (how stakeholders will be engaged in future project phases), need for project design or engineering, and any information gaps and need for additional analysis.
- Any next steps to address permitting, environmental compliance, or legal requirements; financing needs or plans; water rights or infrastructure issues.
- How project performance will be monitored.
- **Discussion of lessons learned.**
 - Describe how development of the strategy benefitted you
 - Identify lessons learned through the course of developing the strategy
 - Identify any feedback for Reclamation on the process or program
- If the recipient already completed significant work on a particular strategy component prior to receiving a Water Strategy Grant, a summary of prior work must be included when addressing that component in the strategy document.

B. Activities Eligible under Required Project Component 2: Analyses, Scoping and Planning Activities

As described above, Water Strategy Grant projects must address required project component 2 Analysis, Scoping and Planning Activities, including sub-components a-c. Following is a description of potential tasks to meet project component 2. The applicant can substitute appropriate tasks or may provide explanations for certain tasks that have already been completed or are not necessary but, collectively, the tasks identified by the applicant to meet project component 2 should contribute to a holistic, overarching, water strategy.

- **Technical Analyses to Identify Problems, Needs and Opportunities:** Conducting hydrologic, engineering, or environmental analyses to better understand the water supply, water quality, and restoration problems and needs that exist in the study area and to identify options to address those needs for municipal, agricultural, Tribal, and environmental water uses, mitigation of climate change impacts, enhancement of commercial, recreational, subsistence, or Tribal ceremonial fishing, or enhancement of river-based recreation. These types of analyses could include but are not limited to:
 - Water availability analyses or establishment of a water balance including assessment of the availability of surface or groundwater, the availability of future water supplies using climate change projections, and assessment of current and future water demands for relevant water uses. Note: if you have questions about how to consider climate change within your study, or are looking for resources to support this type of analysis, please contact your local Reclamation office or the WaterSMART Program office.
 - Modeling reservoir or system operations to develop scenarios for optimizing use of existing infrastructure

Notice of Funding Opportunity No. R23AS00109

- Completion of hydrologic analyses, hydraulic modeling, wetland evaluations, watershed assessments, geotechnical investigations, or floodplain assessments.
- Assessment of drought preparedness and existing infrastructure and to identify needs and options for new drought strategies or infrastructure (e.g., additional storage, new conveyance to access additional water supplies, interties to support water transfers, or infrastructure to support river restoration for ecological purposes), including nature-based solutions.
- Assessment of the need and options for potential infrastructure improvements to increase water conservation and efficiency, such as lining or piping canals to decrease water losses, installation of automated gates, water measurement devices, or other infrastructure to support water marketing or environmental benefits.
- Assessment of river-based ecosystem or watershed restoration needs and opportunities, including needs for aquatic plant and animal habitat, ecosystem or watershed health, and restoration of other ecological values. This could include but is not limited to development of:
 - Baseline information about habitat or species, aquatic conditions, and other needs for watershed or ecosystem health;
 - Metrics for improving habitat, and identification of best management practices; and,
 - Identifying potential restoration projects benefiting ecological value or watershed health, fish and wildlife habitat, mitigation of climate change impacts, enhancement of commercial, recreational, subsistence, or Tribal ceremonial fishing, or enhancement of river-based recreation.
- If some measurements, monitoring, or field work is required to complete the analyses described above in this section, such work may be eligible for funding so long as funding for this work does not exceed 30 percent of the total project cost and the applicant includes funding in their budget for related environmental and cultural resources compliance costs.
- **Water Marketing and Water Rights Analyses:** Conducting analyses to explore water marketing options or to investigate the use different sources of water supply for water management or restoration purposes, including:
 - Financial or economic analyses to identify potential buyers and sellers, assess demands for the water market, and research the cost of implementing the water market.
 - Researching different water marketing approaches to support development of administrative or institutional requirements for implementation of a water market/water marketing activities.

Attachment 1 -- Water Strategy Grants

- Analyzing water rights issues, including legal mechanisms for transferring water within the relevant area, and legal constraints on existing water rights (type and place of use requirements, title issues, or other constraints). Note: Funding for legal analysis cannot exceed 30 percent of the total project cost and may not be used for the preparation of a specific water court case.
- Quantifying water rights, consumptive use, diversions, and return flows to determine how much water is available for marketing or for other use in meeting water supply needs and to avoid impacts to downstream water users.
- Analyzing economic, social, community, and environmental impacts of potential market/transaction(s).
- Projects to develop a water marketing strategy may include pilot activities to test moving water if a pilot would support the development of a water marketing strategy, in compliance with applicable laws. Pilot projects may include a short-term lease of water to perform pilot activities; however, projects may not include a water rights purchase or long-term lease of water rights. If a pilot is included, the applicant must include funding in their budget for related environmental compliance work.
- **Research of Legal and Institutional Requirements**
 - Conduct research on legal and institutional requirements; permitting and environmental compliance; land ownership and necessary easements; and state and/or local requirements with the potential to affect implementation of the project.
 - Research the impacts of any proposed projects on contractual water and power supply obligations, water rights, Tribes, and other area stakeholders.
- **Decision Support Tools:** Analysis of the need for decision support tools, including software databases, registries, dashboards or models that would help facilitate water management improvements, water marketing or river restoration. *Note:* Some work that would be considered development or modification of decision support tools to support the overall strategy development may be eligible for funding so long as it is integral to the strategy and funding for this work does not exceed 30 percent of the total project cost.
- **Development and Comparison of Project Alternatives:** Work to prioritize, compare or otherwise scope potential project alternatives, could include, but is not limited to:
 - Formulate alternatives and create decision matrix
 - Compare project alternatives, qualitative or quantitative comparison of costs and benefits
 - Solicit stakeholder input on potential project options
 - Create a prioritized list of potential future projects.

C. Submittal of a Draft Strategy for Review

~~As will be specified in your financial assistance agreement if your project is selected for award,~~
120 days prior to the completion of the period of performance for the award, recipients must submit their draft strategy to Reclamation for review and feedback.

Reclamation review of the strategy document is only to ensure compliance with program requirements, not to approve the recommended approach or decisions documented in the strategy.

(1) Except as otherwise provided, each administering agency shall require the inclusion of the following language as a condition of any grant, contract, loan, insurance, or guarantee involving federally assisted construction which is not exempt from the requirements of the equal opportunity clause:</p> <p>The applicant hereby agrees that it will incorporate or cause to be incorporated into any contract for construction work, or modification thereof, as defined in the regulations of the Secretary of Labor at 41 CFR Chapter 60, which is paid for in whole or in part with funds obtained from the Federal Government or borrowed on the credit of the Federal Government pursuant to a grant, contract, loan, insurance, or guarantee, or undertaken pursuant to any Federal program involving such grant, contract, loan, insurance, or guarantee, the following equal opportunity clause:</p> <p>During the performance of this contract, the contractor agrees as follows:</p> <p>(1) The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, sexual orientation, gender identity, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, sexual orientation, gender identity, or national origin. Such action shall include, but not be limited to the following:</p> <p>Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.</p> <p>(2) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, or national origin.</p> <p>(3) The contractor will not discharge or in any other manner discriminate against any employee or applicant for employment because such employee or applicant has inquired about, discussed, or disclosed the compensation of the employee or applicant or another employee or applicant. This provision shall not apply to instances in which an employee who has access to the compensation information of other employees or applicants as a part of such employee's essential job functions discloses the compensation of such other employees or applicants to</p>	<p>41 CFR §60-1.4(b) and 2 CFR 200 APPENDIX II (C)</p>

Individuals who do not otherwise have access to such information, unless such disclosure is in response to a formal complaint or charge, in furtherance of an investigation, proceeding, hearing, or action, including an investigation conducted by the employer, or is consistent with the contractor's legal duty to furnish information.

(4) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(5) The contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(6) The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(7) In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(8) The contractor will include the portion of the sentence immediately preceding paragraph (1) and the provisions of paragraphs (1) through (8) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance:

Provided, however, that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

The applicant further agrees that it will be bound by the above equal opportunity clause with respect to its own employment practices when it participates in federally assisted construction work: Provided, that if the applicant so participating is a State or local government, the above equal opportunity clause is not applicable to any agency, instrumentality or subdivision of such government which does not participate in work on or under the contract.

The applicant agrees that it will assist and cooperate actively with the administering agency and the Secretary of Labor in obtaining the compliance of contractors and subcontractors with the equal opportunity clause and the rules,

regulations, and relevant orders of the Secretary of Labor, that it will furnish the administering agency and the Secretary of Labor such information as they may require for the supervision of such compliance, and that it will otherwise assist the administering agency in the discharge of the agency's primary responsibility for securing compliance.

The applicant further agrees that it will refrain from entering into any contract or contract modification subject to Executive Order 11246 of September 24, 1965, with a contractor debarred from, or who has not demonstrated eligibility for, Government contracts and federally assisted construction contracts pursuant to the Executive Order and will carry out such sanctions and penalties for violation of the equal opportunity clause as may be imposed upon contractors and subcontractors by the administering agency or the Secretary of Labor pursuant to Part II, Subpart D of the Executive Order. In addition, the applicant agrees that if it fails or refuses to comply with these undertakings, the administering agency may take any or all of the following actions: Cancel, terminate, or suspend in whole or in part this grant (contract, loan, insurance, guarantee); refrain from extending any further assistance to the applicant under the program with respect to which the failure or refund occurred until satisfactory assurance of future compliance has been received from such applicant; and refer the case to the Department of Justice for appropriate legal proceedings.

(c) Subcontracts. Each nonexempt prime contractor or subcontractor shall include the equal opportunity clause in each of its nonexempt subcontracts.

(d) Inclusion of the equal opportunity clause by reference. The equal opportunity clause may be included by reference in all Government contracts and subcontracts, including Government bills of lading, transportation requests, contracts for deposit of Government funds, and contracts for issuing and paying U.S. savings bonds and notes, and such other contracts and subcontracts as the Director of OFCCP may designate.

(e) Incorporation by operation of the order. By operation of the order, the equal opportunity clause shall be considered to be a part of every contract and subcontract required by the order and the regulations in this part to include such a clause whether or not it is physically incorporated in such contracts and whether or not the contract between the agency and the contractor is written.

(f) Adaptation of language. Such necessary changes in language may be made in the equal opportunity clause as shall be appropriate to identify properly the parties and their undertakings.
