DEFINITIONS

CCF 1 CCF = 100 cubic feet of gas. This is how we measure your monthly usage.

Customer charge and base amount. Covers fixed costs for reading meters, issuing bills, maintaining facilities and gas lines, postage, etc. These costs occur even if you do not use gas during a billing period.

Gas Cost Adjustment (GCA) is the cost CenterPoint Energy pays for the gas it delivers to its customers.

Storage inventory charge allows the Company the opportunity to recover the regulated carrying cost of its investment in storage.

Reimbursement of local franchise fee is a fee paid to the city for the company's use of right-of-way in streets and alleys.

Reimbursement of state gross receipts tax is a tax imposed by the State of Texas on each utility company located in an incorporated city having a population of more than 1,000.

For a more detailed description of each of the terms used on your bill, please visit CenterPointEnergy.com/definitions or call Customer Support at 800-427-7142.

Manage billing peaks

Get Average Monthly Billing.

Cold weather typically means more natural gas used for heating. Combine that with forecasted increases in the cost of natural gas and you will likely see higher heating bills this year compared to last year.

With *Average Monthly Billing (AMB)*, you can smooth out those monthly billing peaks for more predictable bills that are easier on your budget.

To learn more, visit
CenterPointEnergy.com/AMB.

Know the signs of CARBON MONOXIDE (CO) exposure

Headaches

Nausea

Breathlessness

Collapse

Dizziness

Loss of consciousness

CO is a colorless, odorless, tasteless gas that, when inhaled, is dangerous and potentially poisonous. Poorly maintained, improperly vented furnaces, space heaters and stoves are common sources of CO. Treatment is usually breathing fresh air or oxygen, but severe exposure requires medical attention.

If you smell gas, act fast!

Houston..... 800-752-8036
Texas (not Houston Metro) .. 888-876-5786
CenterPointEnergy.com/GasSafety

Natural gas is colorless and odorless – so we add a distinctive odor that smells like rotten eggs to help you detect a leak. If you ever smell that odor in your home, follow these simple steps to keep your family safe:

- **Leave** immediately on foot.
- **Do not** use your telephone or appliances, light a match or turn light switches on or off. Sparks could ignite natural gas.
- **Call 911** and the appropriate CenterPoint Energy emergency gas leak telephone number **from a safe distance**. Do not assume someone else has already called. The odor will be investigated at no charge.

Escanee aquí para obtener más información sobre la seguridad del gas natural.

220920_02_CNP

November, 2022

A safety message from CenterPoint Energy

If you smell natural gas, leave immediately. Call our Gas Leak Hotline at 800-296-9815. Do not use or store flammable products such as gasoline in the same room or area near the water heater or any other gas appliance.

Si percibes un olor a gas natural, sal inmediatamente. Llama a nuestra línea telefónica para fugas de gas a uno de los números de teléfono que aparecen arriba. No use ni almacene productos inflamables tales como gasolina en la misma habitación o en áreas cercanas a un calentador de agua u otro tipo de aparato a gas.

How to read your meter

The following is an example of how to read a typical meter index.

Look at the four dials with their curved arrows. Read from right to left as follows:

1. Read the "thousand-foot" dial as 7, the last number that the pointer passed. Note that the curved arrow on the dial shows a clockwise movement of the pointer.
2. Read the next dial, the "100-thousand" dial. The curved arrow on the dial above shows a

counterclockwise direction. The pointer is near the 9, but to be sure whether to read it as that number or the lower number 8, the previously mentioned "same or lower number rule" must be applied. Since the pointer in the "thousand-foot" dial to the right is nearer the 8 and the pointer has not reached the 0, the "100-thousand" dial should be read as 8.

3. Read the "100-thousand" dial, it seems to point to 2. Double-check by using the rule above. Since the pointer of the "100-thousand" dial is between 8 and 9, take the lower reading number, 1, for the "100-thousand" dial.

4. Read the left-most dial, the "million-foot" dial. The pointer is near the 6. Using the "same or lower number rule", we find the pointer on the dial to the right is between 1 and 2, so we read the "million-foot" dial exactly as the number it is on or near, 6.

The entire meter reading is 6187.

Look at the four dials with their curved arrows. Read from right to left as follows:

1. Read the "thousand-foot" dial as 7, the last number that the pointer passed. Note that the curved arrow on the dial shows a clockwise movement of the pointer.
2. Read the next dial, the "10-thousand" dial. The curved arrow on the dial above shows a

counterclockwise direction. The pointer is near the 9, but to be sure whether to read it as that number or the lower number 8, the previously mentioned "same or lower number rule" must be applied. Since the pointer in the "thousand-foot" dial to the right is nearer the 8 and the pointer has not reached the 0, the "10-thousand" dial should be read as 8.

3. Read the "100-thousand" dial, it seems to point to 2. Double-check by using the rule above. Since the pointer of the "10-thousand" dial is between 8 and 9, take the lower reading number, 1, for the "100-thousand" dial.

4. Read the left-most dial, the "million-foot" dial. The pointer is near the 6. Using the "same or lower number rule", we find the pointer on the dial to the right is between 1 and 2, so we read the "million-foot" dial exactly as the number it is on or near, 6.

The entire meter reading is 6187.
