Customer charge: $34.74
Pipeline safety fee: $1.04
Total current charges: $35.78

The customer charge includes the current GRIP surcharge of $2.30.

Custom Information

Your account, managed your way
Sign up at CenterPointEnergy.com/myaccount
- 24/7 online account access. View and pay your bill, view usage history, sign up for account services and much more.
- Go paperless. Receive an email when your bill is ready to view and pay. Get convenience, get rid of clutter.
- Pay automatically. Set up AutoPay by signing and returning the form below with your check payment. It's that easy!
- Even out the highs and lows of your monthly bills. Enroll in Average Monthly Billing and spread your natural gas costs throughout the year.
- Get bill reminders. Choose text or email, up to five days before your bill is due.
- Other services. Report a payment made at a payment location, set up a payment extension and much more. View options from your online account or visit CenterPointEnergy.com/selfservice if you'd prefer not to register.
- Moving? Please call us at 800-427-7142 at least two weeks before you move, or complete the forms at CenterPointEnergy.com/selfservice

Mail payments to CenterPoint Energy, PO Box 4981, Houston, TX 77210-4981
Does your spring cleaning list include changing worn-out fridge, water and HVAC filters?

Our partnership with Discount Filter Store lets you order quality, name-brand filters right from your phone or computer.

April offer for all CenterPoint Energy customers:
- 15% off all Tier1 brand filters
- FREE shipping
- PROMO Code: hsp15off

CenterPointEnergy.com/Filters or call 800-277-3458.

DYI: Weatherization 101
Adding insulation is a cost-effective way to reduce your home's heating and cooling bills.

In the winter, heat flows from heated living spaces to unheated attics, basements and through ceilings, walls and floors. During cooling season, heat flows from the outdoors to the interior. Proper insulation provides an effective resistance to the flow of heat.

For tips, tools and advice, visit Energy.Gov/EnergySaver.

Weathering a spring storm
Your reliable natural gas service is rarely affected by storms. But if your home gets damaged, follow these safety steps:

- Do not turn off natural gas at the meter. Meters maintain proper line pressure and prevent water from entering pipes if flooding occurs.
- To cut off natural gas service, turn gas off at each appliance.

If you smell natural gas:

- Leave immediately on foot. Cars, light switches and phones (including mobile phones) could cause a spark.
- When at a safe location, call 911 and CenterPoint to report.

CenterPointEnergy.com/WeatherSafety
If you smell natural gas, leave immediately. Call our Gas Leak Hotline at 800-296-9015. Do not use or store flammable products such as gasoline in the same room or area near the water heater or any other gas appliance.

A safety message from CenterPoint Energy

Si percibes un olor a gas natural, sal inmediatamente. Llama a nuestra línea telefónica para fugas de gas a uno de los números de teléfono que aparecen arriba. No use ni almacene productos inflamables tales como gasolina en la misma habitación o en áreas cercanas a un calentador de agua u otro tipo de aparato a gas.

How to read your meter

The following is an example of how to read a typical meter index.

1. Read the "thousand foot" dial as 7, the last number that the pointer passed. Note that the curved arrow on the dial shows a clockwise movement of the pointer.
2. Read the next dial, the "10 thousand" dial. The curved arrow on the dial above shows a counterclockwise direction. The pointer is near the 9, but to be sure whether to read it as that number or the lower number 8, the previously mentioned "same or lower number rule" must be applied. Since the pointer in the "thousand foot" dial to the right is nearer the 8 and the pointer has not reached the 0, the "10 thousand" dial should be read as 8.
3. Read the "100 thousand" dial. It seems to point to 2. Double check by using the rule above. Since the pointer of the "10 thousand" dial is between 8 and 9, take the lower reading number, 1, for the "100 thousand" dial.
4. Read the left most dial, the "million-foot" dial. The pointer is near the 8. Using the "same or lower number rule", we find the pointer on the dial to the right is between 1 and 2, so we read the "million-foot" dial exactly as the number it is on or near; 6.

The entire meter reading is 8187.
